Art Unit: 1761

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to a candy, classified in class 426, subclass 87.
- II. Claims 14-21, drawn to a method of making a candy, classified in class 426, subclass 515.

The inventions are distinct, each from the other because the product as made in Group I can be made by methods other than that recited in Group II. For example, the product as claimed in Group I does not require an automated system but could be made in a batch process or even by hand. Also, the candy could be made without cooking a syrup mixture at low pressure or near vacuum. In fact, Group I could be made from a non carbohydrate sweetener without any cooking. Also, the method as claimed in Group II can be used to make a product other than that recited in Group I; e.g. a candy without a printed edible image.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring separate searches, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
